

Compliant Insider Threat Protection for **Health Services**

Health services is the most targeted sector for data breaches and pays an average of \$10 M per breach - the highest of any industry. With employees causing over one-third of the breaches plaguing the health industry, businesses like yours need a holistic solution that delivers data security and HIPAA governance while accounting for the human element.

Did You Know?

A global survey found that **33%** of data breaches in healthcare were due to accidental behaviors, and **25%** were planned leaks by an employee.

✓ **Protect Patient Information**

Protect PII, PHI, ICD, EMR and other sensitive patient and company data against misuse

✓ **Safeguard Payment Processes**

Secure EDI, claim transactions, benefit enrollments and financial records

✓ **Secure R&D, Trade Secrets and IP**

Protect sensitive data like research, drug patents, and medical studies against loss

✓ **Conduct Thorough Investigations**

Leverage screen/audio recordings, alert reports and immutable logs for forensics

✓ **Eliminate Third-Party Risks**

Protect against accidental, negligent and malicious actions of insurers, providers, payment processors and other vendors

✓ **Manage HIPAA and Other Regulations**

Automatically enforce proper data usage and security in line with HHS, HIPAA and subsequent Omnibus updates

✓ **Protect PHI on Any Egress Point**

Discover and classify PHI and other data in-motion on any egress point

✓ **Monitor Any App, Including Custom Built**

Track user activity on any app, like HIM systems and specialized healthcare software

✓ **Prevent Medical Fraud and Abuse**

Monitor behavior to prevent false claims, inventory loss, kickbacks & drug diversions

✓ **Track Privileged Users**

Ensure data is protected against any user, including those with privileged access

"Since we installed Teramind, we've caught more than one employee trying to steal research. It's been the best solution for us to detect and stop data breaches of our IP." - Enterprise Hospital Customer
